Expected July 2025

Bachelor of Engineering, Mechanical Engineering;

PROJECTS

CHATTER

ReactJs, TypeScript, Redux, Firebase and CSS3

[Live](#) [Code](#)

- Spearheaded the development **CHATTER BLOGGING WEBSITE** using React, TypeScript, CSS and firebase.
- Employed Firebase Authentication for effective user authentication system which includes signup, login and google login features.
- Utilizing AJAX, TypeScript and Firebase's firestore and storage, I built the logic for creating and deleting of posts and reading posts from other writers.
- Using CSS, I built a visually appealing and responsive user interface.

RETRO ECOMMERCE WEBSITE

VueJs, JavaScript, Vuex, Firebase and CSS3

[Live](#) [Code](#)

- Spearheaded the development **RETRO ECOMMERCE WEBSITE** with Vue, JavaScript, CSS and firebase.
- Built an effective user authentication system using firebase auth. Users can effectively Signup, login (both with email and google login) and logout
- Created an Admin user who can add product to the shop and monitor orders from users
- Built the cart system where users can add desired products to cart and effectively access from any device
- Integrated flutterwave secured payment gateway, facilitating a secured, easy and hassle- free checkout system and online transactions.

TECHNICAL

- **Programming Languages:** HTML, CSS, JavaScript and TypeScript
- **Frameworks:** ReactJs, VueJs, Tailwind CSS, Chakra UI
- **Others:** Git, Firebase, Redux, Vuex
